

Artemis Income Fund (the “fund”)

Class I accumulation units, GBP [ISIN: GB00B2PLJH12]

The fund is managed by Artemis Fund Managers Limited.

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and risks of investing in the fund. You are advised to read it so you can make an informed decision about whether to invest.

OBJECTIVES AND INVESTMENT POLICY

Objective

To grow both income and capital over a five year period.

Investment policy

What the fund invests in

- 80% to 100% in company shares.
- Up to 20% in bonds, cash and near cash, other transferable securities, other funds (up to 10%) managed by Artemis and third party funds, money market instruments, and derivatives.

Use of derivatives

The fund may use derivatives for efficient portfolio management purposes to:

- reduce risk
- manage the fund efficiently.

Where the fund invests

- At least 80% in the United Kingdom
- Up to 20% in other countries

Industries the fund invests in

- Any

Other limitations specific to this fund

- None

Investment strategy

- The fund is actively managed.
- The manager believes that a company’s free cashflow yield drives its valuation.
- Accordingly, the fund focuses on companies’ free cashflow yield by taking into account current and prospective dividends and the likelihood of the dividend being maintained in the future.

Benchmarks

- FTSE All-Share Index TR
A widely-used indicator of the performance of the UK stockmarket, in which the fund invests. It acts as a ‘comparator benchmark’ against which the fund’s performance can be compared. Management of the fund is not restricted by this benchmark.
- IA UK Equity Income NR
A group of other asset managers’ funds that invest in similar asset types as this fund, collated by the Investment Association. It acts as a ‘comparator benchmark’ against which the fund’s performance can be compared. Management of the fund is not restricted by this benchmark.

Other information

- Dealing frequency: Normally Monday to Friday except UK public holidays and non-dealing days. Visit www.artemisfunds.com/non-dealing-days for more information. Instructions received before 12 noon UK time will be processed at 12 noon on the same day.
- Distribution policy: This is an accumulation class. Income received is reinvested in the value of the fund.

RISK AND REWARD PROFILE

- The fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the fund.
- The risk category has been calculated using historic data and may not be a reliable indicator of the fund’s future risk profile.
- A risk indicator of “1” does not mean that the investment is “risk free”.

The risk indicator may not fully take into account the following risks and the following may affect fund performance:

- **Market volatility risk:** The value of the fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- **Currency risk:** The fund’s assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the fund’s value.
- **Income risk:** The payment of income and its level is not guaranteed.
- **Charges from capital risk:** Where charges are taken wholly or partly out of a fund’s capital, distributable income may be increased at the expense of capital, which may constrain or erode capital growth.

Please refer to the fund’s prospectus for full details of these and other risks which are applicable to this fund.

CHARGES FOR THE FUND

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charge	0.800%
----------------	--------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

- The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. The charges reduce the potential growth of your investment.
- The ongoing charges figure is an estimate rather than a historic figure because this better reflects the expected future charges. The charges may vary from year to year. The exact charges made for each financial year are contained in the fund's annual report.
- Some or all of the annual management charge is taken from capital.

For more information about charges, please see the fund's prospectus, which is available at www.artemisfunds.com or www.fundinfo.com.

Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

MI Quilter Cheviot Alternative Assets Fund (“the Fund”) A Accumulation Shares

This is a sub fund of MI Quilter Cheviot Investment Funds. The Fund is a non-UCITS retail scheme Open Ended Investment Company. ISIN: GB00BMT7RF99. Apex Fundrock Ltd is the Authorised Corporate Director of the Fund (“MI” and “MI Funds” are trading names of the ACD).

Objectives and investment policy

The Fund aims to deliver capital growth and income on a rolling five-year basis, by investing predominantly in a diversified portfolio of asset classes either directly or indirectly.

The Fund will typically invest at least 90% of the portfolio indirectly but at times, dependent on market conditions and the Investment Manager’s view of the market, the indirect exposure may be higher or lower than 90% but is never expected to fall below 80%.

The Fund’s indirect investments will include other investment funds (which may include those that are managed or operated by the ACD or an associate of the ACD), to give further exposure to a diversified portfolio of asset classes.

The Fund will have typically 70% (but a minimum of 50%) invested in alternative asset classes such as: property; commodities (such as gold and precious metals); private equity; infrastructure; currency; derivatives; and funds with absolute return strategies and multi asset strategies. The exposure to property and commodities will vary and may at times be significant.

Absolute return funds aim to deliver positive returns regardless of the direction of broader investment markets. Multi asset funds invest across different asset classes, seeking to achieve asset diversification within the one fund.

The Fund may also hold other assets, including company shares, government bonds, investment grade and/or sub-investment grade corporate bonds and cash.

Bonds are like loans that pay a fixed or variable rate of interest issued by governments, companies and other large organisations worldwide. Bonds are classified by rating agencies for their creditworthiness: those rated ‘investment grade’ generally carry a relatively low risk of default but also tend to offer lower yields than ‘non-investment grade’ bonds which, in turn, generally have a higher risk of default but also tend to offer higher yields.

The Fund may use derivatives, which are sophisticated instruments whose value is linked to the rise and fall of other assets, to achieve its investment objectives and for the purposes of hedging and efficient portfolio management, with the aim of managing risk and cost.

The Fund is actively managed. This means the Investment Manager uses their expertise to pick investments to achieve the Fund’s objective.

Any income this share class generates will be reinvested to grow the value of your investment.

You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the Prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund’s ranking on the Risk and Reward Indicator.

- The Fund is ranked 4 because funds of this type have experienced average rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
- Investing overseas can bring additional returns and spread risk to different markets. There are risks, however, that changes in currency exchange rates may cause the value of your investment to decrease or increase.
- Investing in other funds may expose investors to increased risk due to less strict regulations and the use of derivatives. These other funds can themselves invest into assets such as bonds, company shares, cash and currencies. The objectives and risk profiles of these underlying funds may not be fully in line with those of this Fund.
- The Fund may invest in property funds which can be less liquid than other asset classes.
- In difficult market conditions, the value of some investments may be less predictable than normal and the Fund may not be able to buy and sell these investments at the best time or at a fair price. This could affect the Fund’s performance, potentially reducing your returns.
- The Fund may invest in bond funds which will be impacted by changes in interest rates, inflation and any decline in creditworthiness of the underlying bond issuers.
- The Fund can use derivatives in order to meet its investment objectives or to protect from price and currency movement. This may result in gains or losses that are greater than the original amount invested.
- For further risk information please see the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	1.02%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- For the ongoing charge, the figure is as at 30 April 2023.
- You may also be charged a dilution levy on entry to or exit from the Fund, this is to cover costs associated with your transaction.
- For more information about charges, please see the prospectus.

Vanguard U.K. Investment Grade Bond Index Fund (the "Fund")

A sub-fund of Vanguard Investment Series Plc

GBP Acc

ISIN: IE00B1S74Q32

Manager: Vanguard Group (Ireland) Limited ("VGIL")

Objectives and investment policy

- The Fund employs a passive management – or indexing – investment approach and seeks to track the performance of the Bloomberg GBP Non-Government Float Adjusted Bond Index (the "Index").
- The Index includes Sterling-denominated investment-grade bonds, excluding UK government debt and government related bonds, with maturities greater than one year. Investment-grade bonds are generally bonds with a relatively low risk of default.
- The Fund attempts to:
 1. Track the performance of the Index by investing in a portfolio of securities that, insofar as possible and practicable, consists of a representative sample of the component securities of the Index.
 2. Remain fully invested except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The base currency of the Fund is GBP.
- The Fund may not be appropriate for short-term investment.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus) by submitting an application in writing. A list of the days on which shares in the Fund cannot be bought or sold is available on

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 4 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of bonds and fixed income-related securities is affected by influential factors such as interest rates, inflation, credit spreads and volatility which, in turn, are driven by other factors including political, economic news, company earnings and significant corporate events.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.
 - Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily which could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however,

expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.

- Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at <https://global.vanguard.com>

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

American Index Fund

a sub-fund of HSBC Index Tracker Investment Funds, (the "OEIC");
managed by HSBC Global Asset Management (UK) Limited

Class: Accumulation C
ISIN: GB00B80QG615

Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on our website: <http://www.assetmanagement.hsbc.com>.

Objectives and Investment Policy

- The Fund aims to track the performance of the S&P 500 Index (the "Index") before the deduction of charges and tax.
- The Index is made up of the 500 largest stock market listed companies in the United States of America, as defined by the Index provider.
- The Fund will invest directly in shares (**equities**) of all of the companies that make up the Index and in the same or very similar proportions in which they are included in the Index.
- However, there may be circumstances when it is not possible or practical for the Fund to invest in shares of all the companies of the Index. The Fund may not invest in all the companies of the Index to manage transaction costs or to reflect market conditions, regulations or HSBC's banned weapons policy.
- The Fund may hold cash and other funds, including funds managed by the **HSBC Group**, to manage day-to-day cash flow requirements.
- The anticipated **tracking error** for the Fund is expected to be up to 0.10%.

Use of derivatives

- The Fund may invest in different types of **derivatives** for **efficient portfolio management**, including **hedging**. In particular the Fund may use **derivatives** to help it manage cash flows and dividend payments with the aim of generating **returns** that are consistent with the Index. The use of **derivatives** will be consistent with the risk profile of the Fund.
- The Fund may enter into securities lending transactions for up to 29% of its assets. However, this is not expected to exceed 25%.
- Income is reinvested.
- You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 5 because its price or simulated data has shown medium to high fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- **Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly

reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

- **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- **Index Tracking Risk** To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- **Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- **Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

The Fund is authorised in the United Kingdom and regulated by the Financial Conduct Authority. HSBC Global Asset Management (UK) Limited is authorised in the United Kingdom and regulated by the Financial Conduct Authority.

This key investor information is accurate as at 16 February 2023.

FTF Martin Currie UK Smaller Companies Fund

Class W (acc) • ISIN GB00B7FFF708 • A sub-fund of Franklin Templeton Funds
The management company is Franklin Templeton Fund Management Limited.

Objectives and Investment Policy

The Fund aims to grow in value by more than the Numis Smaller Companies ex-Investment Trusts Index over a three to five-year period after all fees and costs are deducted.

There is no guarantee that the Fund will achieve its objective over this or any other time period. Capital invested is at risk and you may get back less than you paid in.

The Fund invests at least two thirds (but typically significantly more) in shares of smaller companies which are constituents of the Numis Smaller Companies ex-Investment Trusts Index or are listed on the Alternative Investment Market (AIM) exchange and that are incorporated/domiciled in the UK or which have significant business operations in the UK.

The Investment Manager does not intend to invest in every company in the Numis Smaller Companies ex-Investment Trusts Index or AIM but using its expertise and research, select around 40–50 companies it believes will achieve the Fund's objective.

The Investment Manager tries to further reduce risk by making sure no single company share dominates the Fund's investments. Normally the Investment Manager tries to keep shareholdings in any individual company between 1% and 5% of the Fund's total value.

Any proportion of the Fund can be invested into specific industry sectors, but the Investment Manager seeks to avoid any unintentional emphasis on a sector in a way that could increase the level of risk.

The Fund may also invest a proportion of its portfolio in other types of transferable securities, cash and cash equivalents, money market instruments, and other collective investment schemes.

The Fund can use derivatives for efficient portfolio management (managing the fund in a way that is designed to reduce risk or cost and/or generate extra income or growth). However, the Fund can introduce more speculative use of derivatives in the future on 60 days' notice to investors. Derivatives are financial contracts whose value is linked to the price of another asset (e. g. indices, interest rates, share prices or currencies).

In selecting investments, the Investment Manager also assesses environmental, social and governance ("ESG") factors that could impact the ability of an issuer to generate future sustainable returns. These may include

shareholder rights, accounting standards, remuneration, board structure, labour relations, supply chain, data protection, pollution/hazardous waste policies, water usage and climate change policies.

This ESG assessment is quantitative and qualitative, using the Investment Manager's proprietary ESG rating system, and its direct research and engagement process. The proprietary ESG assessment captures forward looking analysis. Investments are assigned a risk rating based on the Investment Manager's assessment of ESG factors. Investments are assigned a score of 1 to 5 in respect of each of governance and sustainability (meaning environmental and social factors), with 5 denoting high risk. Investments with a governance or sustainability risk rating of 4 or above will not be selected for the portfolio. The Investment Manager's assessment of a company's ESG characteristics may impact the Investment Manager's view of that company's financial valuation and attractiveness.

Where the Investment Manager identifies areas that do not meet expectations of best practice on material governance or sustainability issues, the Investment Manager will engage with companies to encourage improvement

The Fund will not invest in:

- Companies which generate revenue from the production or distribution of controversial weapons (I.e. antipersonnel mines, biological and chemical weaponry and cluster munitions).
- Companies assessed as 'fail' under the UN Global Compact.

You may request the sale of your shares in the Fund on any UK business day.

The income received from the Fund's investments is accumulated and included in the value of the shares.

For further information on the Objectives and Investment Policy of the Fund, please refer to the "Investment Objectives and Policies of the Funds" section of the current prospectus of Franklin Templeton Funds.

Terms to Understand

Shares of companies (equities): securities that represent an ownership stake in a company.

Transferable securities: investments such as shares or debt that can be bought and sold between investors.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

Why is the Fund in this specific category?

The Fund invests mainly in equity securities of smaller UK companies that are no larger than the largest company in the Numis Smaller Companies ex-Investment Trusts Index. Such securities have historically been subject to price movements, sometimes to a greater extent than securities of larger UK

companies, due to company-specific factors or movements in the UK equity markets generally. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods.

Risks materially relevant not adequately captured by the indicator:

Concentration risk: the risk that arises when a fund invests in relatively few holdings, few sectors or a restricted geographic area. Performance may be more volatile than a fund with a greater number of securities.

Equity risk: prices of equities may be affected by factors such as economic, political, market, and issuer-specific changes. Such changes may adversely affect the value of the equities regardless of company-specific performance.

Investment in smaller company shares: the fund buys shares in smaller companies. It may be difficult to sell these shares, in which case the fund may not be able to minimise a loss on such shares.

Liquidity risk: the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Such risk may be triggered by (but not limited to) unexpected events such as environmental disasters or pandemics. Reduced liquidity may have a negative impact on the price of the assets.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Factors" section of the current prospectus of Franklin Templeton Funds.

Royal London Sterling Credit Fund (Accumulation - Class M Shares)

A sub-fund of Royal London Bond Funds ICVC ISIN: GB00B8GJ8S05
Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective The Fund's investment objective is to achieve a total return (combination of capital growth and income) over the medium term (3-5 years) by investing at least 80% in sterling-denominated corporate bonds. The Fund's performance target is to outperform, after the deduction of charges, the Markit iBoxx Sterling Non-Gilts Total Return GBP Index (the "Index") over a rolling 5-year period. For further information on the Fund's index, please refer to the Prospectus. The Fund is actively managed.

Policy At least 80% of the Fund will be invested in investment grade corporate bonds and in index linked corporate bonds, securitisations, supranational bonds, agency bonds, floating-rate notes and asset-backed securities each denominated in sterling or hedged back to sterling. These Investments will generally be fixed-rate issues (bonds paying interest at an unchanging rate, rather than on an adjustable basis). The remainder of the Fund's assets may be invested in a range of securities, including government bonds, preference shares, sub-investment grade bonds, unrated bonds, bonds denominated in currencies other than sterling, other transferable securities, money market instruments and exchange-traded funds. Up to 10% of the Fund may be invested in other funds known as collective investment schemes, including those managed by Royal London Unit Trust Managers or another Royal London Group Company. The Fund may also hold a small amount of its portfolio in derivatives (investments that derive their value from another closely related underlying investment) for the purposes of efficient portfolio management. Cash is unlikely to exceed 5% of assets.

Recommendation The Fund may not be appropriate for investors who plan to withdraw their money within 7 years.

Concepts to understand

Bonds are defined as fixed-income investments issued as debt by companies and public bodies to raise finance. Investors in bonds receive a previously agreed, non-variable interest payment until the investment matures. Corporate bonds are those issued by companies to raise finance.

Total Return A total return is a combination of capital growth and income. Capital growth is defined as the rise in an investment's value over time and income as the payment an investment generates, such as dividends or bond coupons.

Rolling 5 Year Period A rolling 5-year period is any period of five years, no matter which day you start on.

Hedging reduces risk by protecting an investment with another related investment.

Efficient Portfolio Management A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

The fund is shown in risk category 4 because its share price has shown a medium level of volatility historically. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology derived from EU rules.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Investment Risk The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Credit Risk Should the issuer of a fixed income security become unable to make income or capital payments, or their rating is downgraded, the value of that investment will fall. Fixed income securities that have a lower credit rating can pay a higher level of income and have an increased risk of default.

EPM Techniques The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Interest Rate Risk Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Liquidity Risk In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

Counterparty Risk The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Charges from Capital Risk Charges are taken from the capital of the Fund. Whilst this increases the yield, it also has the effect of reducing the potential for capital growth.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:

Entry charge	None
Exit charge	None

Charges taken from the fund over a year:

Ongoing charge	0.53%
----------------	-------

Charges taken from the fund under specific conditions:

Performance fee	None
-----------------	------

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Ongoing charge is based on the Fund Management Fee (FMF), which is the periodic fee paid to the ACD to cover the expenses of the Fund. This figure does not include portfolio transaction costs. Ongoing charges are the same for all investors in the share class.

Past performance

The graph shows fund performance over the past 10 years where available. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.

The Fund was launched on 1 September 2008 as a unit trust and converted to an open-ended investment company (OEIC) on 30 October 2009. The share class was launched on 26 November 2012.

AXA US Short Duration High Yield Fund

A Sub-Fund of AXA Fixed Interest Investment ICVC

Share class : AXA US Short Duration High Yield Fund Z (G) Accumulation GBP (ISIN : GB00B59VLT43)

This Sub-Fund is managed by AXA Investment Managers UK Limited, part of the AXA IM Group

Objective and Investment Policy

Investment Objective

The aim of the Fund is to generate income by investing in high yield debt securities (being sub-investment grade corporate bonds) while seeking to avoid the risk of default.

Investment Policy

The Fund aims to deliver a return by investing at least 60 per cent of its Net Asset Value in high yield bonds (being sub-investment grade corporate bonds, meaning bonds with a rating of BB+ and below by Standard & Poor or equivalent rating by Moody's or Fitch) with a bias towards shorter maturities (where the full repayment of the bond by the company is expected to be less than three years), issued primarily by companies with their predominant place of business in the US. The Fund may also invest in such bonds denominated in US Dollars and issued by non-US companies. The fund manager seeks to reduce the effect of credit risk through diversification and its analysis and selection of bonds.

To avoid investing in bonds issued by companies which present excessive degrees of environmental, social and governance (ESG) risk, the fund manager applies AXA Investment Manager's (AXA IM's) sector specific investment guidelines relating to responsible investment to the Fund. Such guidelines exclude investment in soft commodity derivatives or exposure to certain companies based on their involvement in specific sectors (such as unsustainable palm oil production, controversial weapons and climate risks). The fund manager also applies the AXA IM's ESG Standards policy. This policy excludes investment in companies based on: tobacco production; manufacture of white phosphorus weapons; certain criteria relating to human rights and anti-corruption as well as other ESG factors. The AXA IM's ESG Standards policy and AXA IM's sector specific investment guidelines are subject to change and the latest copies are available from the fund manager on request.

Further, in selecting investments, the fund manager will, in addition to the application of the above policies, take into account the issuer's ESG score as one factor within its broader analysis of the issuer to make selections which are expected to generate an income return over the long term. It is, however, just one component of the fund manager's investment process and ESG scores are not the principal driver of investment decision making. The fund manager believes that issuers with higher ESG scores manage risk associated with ESG issues more effectively, contributing to better financial performance of such issuers in the long term. ESG scores are obtained from our selected external provider(s) and may be adjusted by the fund manager using its own research. The fund manager will not invest in bonds with the

lowest ESG scores, save in exceptional circumstances.

If the fund manager deems that an investment no longer meets the criteria set out in this investment policy or its expectations in terms of that investment's prospects for achieving income and capital growth, the fund manager will disinvest as soon as practicable having regard to the best interests of the Fund's investors and in accordance with its best execution policy.

The Fund does not have a benchmark to measure its financial performance. SONIA Compounded Index may be used by investors to compare the Fund's financial performance, which the fund manager believes best reflects the outcome of the Fund's short duration investment strategy when used to compare the performance of the Fund over a minimum period of three years. Investors should note that the SONIA Compounded Index is a cash-based index, which the fund manager has selected as an appropriate comparator given the absence of a suitable bond index, and therefore does not take account of the specific risks relevant to the Fund. The Fund may also invest in other transferable securities (including, but not limited to, high yield debt securities, investment grade debt securities, convertibles, tbills), cash, deposits, units in collective investment schemes (including funds that are managed by the fund manager or its associates) and money market instruments. The Fund may use derivatives for investment purposes as well as for Efficient Portfolio Management. Use may be made of stock lending, borrowing, cash holdings, hedging and other investment techniques permitted in the applicable Financial Conduct Authority Rules.

Income

Income from investments in the Fund will be rolled up into the value of your shares if you hold accumulation shares.

Fund Currency

The reference currency of the Fund is Sterling.

Investment Horizon

This Fund may not be suitable for investors who plan to withdraw their contribution within three years.

Processing of subscription and redemption orders

Your orders to buy, sell or transfer shares in the Fund, must be received by the Administrator by 12 noon on any working day to receive that day's Fund price. Please note that if your order is placed by an intermediary or Financial Adviser, they may require extra processing time.

The Net Asset Value of this Fund is calculated on a daily basis.

Minimum initial investment: £1,000,000

Minimum subsequent investment: £5,000

Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean risk free.

Why is this Fund in this category?

The capital of the Sub-Fund is not guaranteed. The Sub-Fund is invested in financial markets and uses techniques and instruments which are subject to some levels of variation, which may result in gains or losses.

Additional Risks (risks materially relevant to the fund which are not adequately captured by the indicator)

Counterparty Risk: failure by any counterparty to a transaction (e.g. derivatives and securities lending) with the Fund to meet its obligations may adversely affect the value of the Fund. The Fund may receive assets from the counterparty to protect against any such adverse effect but there is a risk that the value of such assets at the time of the failure would be insufficient to cover the loss to the Fund.

Derivatives: derivatives can be more volatile than the underlying asset and may result in greater fluctuations to the Fund's value. In the case of derivatives not traded on an exchange they may be subject to additional counterparty and liquidity risk.

Hedging Risk: Currency Hedging within the Fund seeks to reduce the impact of exchange rate movements of the investments' currencies relative to the fund's base currency. Over a period of time the hedging strategy itself may

create a positive or negative impact to the value of the Fund, mainly due to differences in short-term interest rates between the currencies.

Interest Rate Risk: fluctuations in interest rates will change the value of bonds, impacting the value of the Fund. Generally, when interest rates rise, the value of the bonds fall and vice versa. The valuation of bonds will also change according to market perceptions of future movements in interest rates.

Liquidity Risk: some investments may trade infrequently and in small volumes. As a result the Fund manager may not be able to sell at a preferred time or volume or at a price close to the last quoted valuation. The Fund manager may be forced to sell a number of such investments as a result of a large redemption of shares in the Fund. Depending on market conditions, this could lead to a significant drop in the Fund's value and in extreme circumstances lead the Fund to be unable to meet its redemptions.

Credit Risk: the risk that an issuer of bonds will default on its obligations to pay income or repay capital, resulting in a decrease in Fund value. The value of a bond (and, subsequently, the Fund) is also affected by changes in market perceptions of the risk of future default. The risk of default for high yield bonds may be greater.

Further explanation of the risks associated with an investment in this Fund can be found in the prospectus.

The Fund is subject to the tax laws and regulations of the United Kingdom. Depending on your own country of residence this might have an impact on your investments. For further details, you should consult a tax adviser.

Liability Statement:

AXA Investment Managers UK Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for the Fund.

Switching between Funds:

Shareholders may apply for their shares to be converted into shares of another Fund, provided that the conditions for accessing the target share class are fulfilled. Investment would be at the Net Asset Value of the target fund, calculated at the applicable Valuation Point following receipt of the conversion request.

The redemption and subscription costs connected with the conversion may be charged to the shareholder as indicated in the prospectus.

For more details about how to switch Fund, please refer to the section in the Fund's prospectus entitled "Can I switch or convert shares and what are the implications?", which is available at <https://funds.axa-im.com>

Schroder Recovery Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited

Class L Accumulation GBP (GB00BDD2F190)

Objectives and investment policy

Objectives

The fund aims to provide capital growth in excess of the FTSE All Share (Gross Total Return) Index (after fees have been deducted) over a three to five year period by investing in equity and equity related securities of UK companies that have suffered a severe setback in either share price or profitability.

Investment policy

The fund is actively managed and invests at least 80% of its assets in equities of UK companies. These are companies that are incorporated, headquartered or have their principal business activities in the UK.

The fund applies a disciplined value investment approach, seeking to invest in a select portfolio of companies that the investment manager believes are significantly undervalued relative to their long-term earnings potential.

The fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market

instruments, and hold cash.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

Benchmark

The fund's performance should be assessed against its target benchmark being to exceed the FTSE All Share (Gross Total Return) Index, and compared against the MSCI UK Value (Gross Total Return) Index and the Investment Association UK All Companies sector average return. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark.

Dealing frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution policy

This unit class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the unit class.

Risk and reward profile

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

Currency risk: The fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their

value from an underlying asset, may be used to manage the portfolio efficiently. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR risk: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference interest rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Charges

One-off charges taken before or after you invest

Entry charge None

Exit charge None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges 0.82%

Charges taken from the fund under certain specific conditions

Performance fee

None

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2022 and may vary from year to year. The ongoing charge figure excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Schroders Annual Charge (as may be discounted for retail unit classes depending on the size of the fund) but certain additional expenses may be charged as set out in the prospectus. The Schroders Annual Charge (without any discount) for this unit class of the fund is 0.84%. The fund's annual report for each financial year will include details on the exact charges made including any discounts.

Please see the prospectus for more details about the charges.

Past performance

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pound after the ongoing charges and the portfolio transaction costs have been paid.

The fund was launched on 05/05/1970.

The shareclass was launched on 01/10/2013.

Performance figures are only available since the launch of the respective share class.

Please note that the fund's benchmarks were changed on 31 March 2021. The past performance in the above table is based on the fund's benchmarks (Target benchmark: FTSE All Share (Gross Total Return) Index. Comparator benchmark: the Investment Association UK All Companies sector average return) in place prior to this date. Going forward, this table will show past performance from this date based on the new benchmarks (Target benchmark: FTSE All Share (Gross Total Return) Index. Comparator benchmarks: MSCI UK Value (Gross Total Return) Index and the Investment Association UK All Companies sector average return).

They are in English, free of charge.

Tax Legislation: The fund is subject to UK tax legislation which may have an impact on your personal tax position.

Liability: Schroder Unit Trusts Ltd may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the fund's prospectus.

Switches: Subject to conditions, you may apply to switch your investment into another share class within this fund or in another Schroder fund. Please see the prospectus for more details.

Remuneration policy: A summary of Schroders' remuneration policy and related disclosures is at www.schroders.com/remuneration-disclosures. A paper copy is available free of charge upon request.

The policy includes a description of how remuneration and benefits are calculated & the identities of persons responsible for awarding the remuneration and benefits.

Glossary: You can find an explanation of some of the terms used in this document at www.schroders.com/ukinvestor/glossary.

Benchmark: The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmarks have been selected because the Investment Manager and the Manager believe that each of these benchmarks is a suitable comparison for performance purposes given the Fund's investment objective and policy.

Vanguard Global Short-Term Bond Index Fund (the "Fund")

A sub-fund of Vanguard Investment Series Plc

GBP Hedged Acc
ISIN: IE00BH65QG55

Manager: Vanguard Group (Ireland) Limited ("VGIL")

Objectives and investment policy

- The Fund employs a passive management – or indexing – investment approach and seeks to track the performance of the Bloomberg Global Aggregate Ex US MBS 1-5 Year Float Adjusted and Scaled Index (the "Index").
- The Index includes global government, government-related agencies, corporate and securitised bonds, with a maturity between 1 and 5 years. Bloomberg applies a filter to the Index to exclude US Mortgage Backed Securities from the universe of fixed income securities.
- The Fund attempts to:
 - Track the performance of the Index by investing in a portfolio of securities that, insofar as possible and practicable, consists of a representative sample of the component securities of the Index.
 - Remain fully invested except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The base currency of the Fund is USD.
- The Fund invests in securities which are denominated in currencies other than the base currency. Movements in currency exchange rates can affect the return of investments. Currency hedging techniques are used to minimise the risks associated with movements in currency exchange rates but these risks cannot be eliminated entirely. As this document relates to a share class where such techniques are used, for the purposes of the "Past performance" section below, the performance of this share class is shown against the Bloomberg Global Aggregate Ex US MBS 1-5 Year Float Adjusted and Scaled Index Hedged in GBP (the "Hedged Index"), which is a currency hedged version of the Index.
- The Fund is appropriate for short-term investment.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus) by submitting an application in writing. A list of the days on which shares in the Fund cannot be bought or sold is available on <https://global.vanguard.com/portal/site/loadPDF?country=global&docId=11630>

For further information about the objectives and investment policy of the Fund, as well as the limited relationship with the Index provider, please see Appendix 1 and Appendix 6 of the Vanguard Investment Series plc prospectus (the "Prospectus") on our website at <https://global.vanguard.com>

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 3 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of bonds and fixed income-related securities is affected by influential factors such as interest rates, inflation, credit spreads and volatility which, in turn, are driven by other factors including political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment. Currency hedging may be used but is not guaranteed to completely eliminate currency risk.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater "Liquidity Risk", restrictions on investment or transfers of assets and failed/delayed delivery of securities or payments to the Fund.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.
 - Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily which could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would

like to do so.

- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at <https://global.vanguard.com>

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Legal & General Short Dated Sterling Corporate Bond Index Fund Unit Class I GBP Accumulation - ISIN: GB00BKGR3H21

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the Markit iBoxx GBP Corporates 1-5 Index, the "Benchmark Index" before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
- The Fund seeks to replicate as closely as possible the constituents of the Benchmark Index. The Fund will have at least 90% exposure to assets that are included in the Benchmark Index.
- The Benchmark Index is comprised of investment grade corporate bonds (a type of loan that pays interest) that are short dated (i.e. up to 5 years in maturity) and denominated in sterling (British Pound).
- The bonds that the Fund invests in will be primarily investment grade (rated as lower risk). Investment grade bonds are bonds that have achieved a higher credit rating from a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
- The Fund may also invest in money market instruments (such as treasury bills), cash, deposits, bonds which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
- The Fund may use derivatives (contracts which have a value linked to the

price of another asset) to:

- reduce risk or cost; or
- generate additional capital or income with no, or an acceptably low, level of risk.

Other information:

- The Fund is passively managed as it tracks the Benchmark Index.
- Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
- You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
- The Fund's base currency is denominated in GBP.
- This Fund may be suitable for investors looking to track the market in investment grade corporate bonds that are short dated and denominated in British Pounds as represented by the Benchmark Index.
- Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
- This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 3 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.

Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- The Fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the Fund may fall.
- This Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the Fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
- We may take some or all of the ongoing charges from the Fund's capital rather than the Fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing charge	0.14%
----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at January 2023. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken from the Capital of the Fund.

Other costs:

- **Dilution adjustment:** On any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.
- This can vary but as an example for this Fund we estimate 0.23% for purchases and 0.23% for sales at 02 February 2023. The amount of the dilution adjustment may differ in future.

For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at www.legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in GBP.
- The Fund may not replicate the performance of the Benchmark Index perfectly due to tracking errors such as expenses, tax and transaction costs incurred by the Fund, which are not included in the Index.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 2014.
- This unit class launched in 2014.

PRACTICAL INFORMATION

- The trustee and depositary is Northern Trust Investor Services Limited.

**iShares North American Equity Index Fund
(UK)**

A sub-fund of BlackRock Collective Investment Funds

Class H Accumulating GBP

ISIN: GB00BPFJD412

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) by tracking closely the performance of the FTSE World North America Index, the Fund's benchmark index.
- ▶ The Fund invests in equity securities (e.g. shares) of companies that make up the benchmark index.
- ▶ The benchmark index measures the performance of equity securities of leading companies listed in the United States and Canada. The benchmark index is a free float-adjusted market capitalisation weighted index. Free float-adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the benchmark index. Free float-adjusted market capitalisation is the share price of a company multiplied by the number of shares readily available in the market.
- ▶ The Fund is passively managed and the investment manager has limited discretion to select the Fund's investments and in doing so will take into consideration the benchmark index.
- ▶ The Fund intends to replicate the benchmark index by holding the equity securities, which make up the benchmark index, in similar proportions to the benchmark index.
- ▶ The Fund may also engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2022. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Charges taken from the Fund over each year	
Ongoing Charges	0.07%**
Charges taken from the Fund under certain conditions	
Performance Fee	None

Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2005. The unit class was launched in 2014.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

†1 FTSE North America Index (GBP)

As of 31 December 2014, the Benchmark Index converted from a close of business valuation to a midday valuation. Historic performance of the Benchmark has been simulated by the Benchmark provider and such data is used for the purposes of demonstrating historic performance in the "Past Performance" table from 31 July 2009 or from the launch of the share class if later.

Liontrust UK Growth Fund is an Authorised Unit Trust and categorised as a UCITS scheme. This document is based upon the I Inc class (ISIN: GB00B56BDS09). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- The Fund aims to deliver capital growth over the long term (5 years or more).

Policy

- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund will invest at least 90% in companies which are incorporated, domiciled or conduct significant business in the United Kingdom (UK).
- The Fund will typically invest 90% (minimum 80%) of its assets in equities or equity related derivatives but may also invest in collective investment schemes (up to 10% of Fund assets), corporate debt securities, other transferable securities, money market instruments, warrants, cash and deposits.
- The Fund is permitted to use derivatives for the purposes of efficient portfolio management and for investment purposes. Please refer to the Derivatives sections in the prospectus.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell units on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk. The Fund is dual priced; it has an offer (buying) price and a bid (selling) price and the difference between these (bid-offer spread) is dependent on the underlying holdings. This means the price investors buying and selling receive is reflective of the underlying transaction costs related to the subscription or redemption to avoid any dilution in the fund's value for existing investors. For a fuller explanation, please visit www.liontrust.co.uk.

Investment process

- A fundamental principle of competitive markets is that profits regress to the mean. The fund managers believe the secret to successful investing is to identify those few companies that have a durable Economic Advantage which allows them to defy this principle and sustain a higher than average level of profitability for longer than expected.
- Economic Advantage is the collection of distinctive characteristics of a company that competitors struggle to reproduce even if those competitors have understood the benefits arising from those characteristics. In the fund managers' experience, the hardest to replicate characteristics fall into the following three categories of intangible assets:
 - Intellectual property
 - Strong distribution channels
 - Significant recurring business
- Other less powerful but nonetheless important intangible strengths include: franchises and licenses; good customer databases and relationships; effective procedures and formats; strong brands and company culture. These intangible assets produce barriers to competition, protect margins and are capable, in the opinion of the fund managers, of reaping a financial advantage in the form of cash flow returns in excess of the cost of capital. The market rewards excess profitability, particularly when it is higher than consensus expectations.
- To be included in portfolios, companies must possess at least one of the main advantages: intellectual property, strong distribution or recurring business (at least 70% of annual turnover).
- Every smaller company held in the Economic Advantage funds has at least 3% of its equity held by senior management and main board directors. Companies are also assessed for employee ownership below the senior management and board and changes in equity ownership are monitored.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 5 primarily for its exposure to UK equities.
- The SRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- The Fund may, under certain circumstances, invest in derivatives, but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions. The use of derivatives may create leverage or gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead. The use of derivative contracts may help us to control Fund volatility in both up and

down markets by hedging against the general market.

- The Fund may encounter liquidity constraints from time to time. The spread between the price you buy and sell shares will reflect the less liquid nature of the underlying holdings.
- The Fund may invest in companies listed on the Alternative Investment Market (AIM) which is primarily for emerging or smaller companies. The rules are less demanding than those of the official List of the London Stock Exchange and therefore companies listed on AIM may carry a greater risk than a company with a full listing.
- The Fund may have both Hedged and Unhedged share classes available. The Hedged share classes use forward foreign exchange contracts to protect returns in the base currency of the Fund.
- Outside of normal conditions, the Fund may hold higher levels of cash which may be deposited with several credit counterparties (e.g. international banks). A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- Counterparty Risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- ESG Risk: there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

Past performance

- Past performance is not a guide to future performance.** It has been calculated on the basis that any distributable income of the Fund has been reinvested. The past performance shown in the chart takes into account all charges except entry and exit charges.

- The Fund launch date is 08 March 1993.
- The I Inc share class launch date is 01 November 2010.
- The base currency of the Fund is pounds sterling.

- The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser or fund platform if you are not using a financial adviser.
- The ongoing charges figure is based on expenses as at 31 December 2022. This figure may vary from year to year. It excludes:
 - portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units/shares in another collective investment undertaking.
- For more information about charges and what is included in each charge, please see the Fund's prospectus, which is available electronically at www.liontrust.co.uk or visit the costs and charges page on our website at www.liontrust.co.uk/costs-and-charges.

Legal & General UK 100 Index Trust

Unit Class I GBP Accumulation - ISIN: GB00B0CNH502

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the FTSE 100 Index, the "Benchmark Index" on a net total return basis before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
 - The Benchmark Index is comprised of the 100 most highly capitalised mature companies listed on the London Stock Exchange.
 - The Fund seeks to replicate the Benchmark Index and its investments will closely match those that make up the Benchmark Index.
 - The Fund will have at least 90% exposure (directly or through depositary receipts (a certificate issued by a bank representing shares in a foreign company such as American depositary receipts and global depositary receipts)) to assets that are included in the Benchmark Index.
 - The Fund may also invest in money market instruments (such as treasury bills), depositary receipts, cash, deposits, shares in companies which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**
- The Fund is passively managed as it tracks the Benchmark Index.
 - Your units will be accumulation units. Income from the Fund's investments (dividends) will be reinvested back into the value of your units.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in GBP.
 - This Fund is designed for investors looking to track the 100 most capitalised mature companies listed on the London Stock Exchange as represented by the Benchmark Index.
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

Lower Risk ← Higher Risk
Potentially lower rewards ← Potentially higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 6 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.

- Even a fund in the lowest category is not a risk free investment.
 - The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.
- The risk and reward indicator may not take account of the following risks of investing in the Fund:
- The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
 - Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
 - The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at May 2023. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any open ended funds it may invest in. In addition to the ongoing charges, the Fund incurs costs relating to investments in closed ended funds (such as investment trusts). These costs vary and are approximately 0.01%.
- Portfolio transaction costs are also excluded from the ongoing charges.
- The ongoing charges are taken from the Income of the Fund.

Other costs:

- **Dilution adjustment:** On any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.
- This can vary but as an example for this Fund we estimate 0.60% for purchases and 0.10% for sales at 02 February 2023. The amount of the dilution adjustment may differ in future.

For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at www.legalandgeneral.com/chargesandfees.

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in GBP.
- The Fund may not replicate the performance of the Benchmark Index perfectly due to tracking errors such as expenses, tax and transaction costs incurred by the Fund, which are not included in the Index.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 1993.
- This unit class launched in 2005.

Dodge & Cox Worldwide Funds plc - U.S. Stock Fund

GBP Accumulating Class

A sub-fund of Dodge & Cox Worldwide Funds plc

ISIN: IE00B50M4X14

SEDOL: B50M4X1

CUSIP: G2800S174

Manager: KBA Consulting Management Limited

Objectives and Investment Policy

The fund seeks long-term growth of principal and income.

The Fund invests primarily in a diversified portfolio of U.S. equity securities. Under normal circumstances, the Fund will invest at least 80% of its total assets in common stocks, preferred stocks, securities convertible into common stocks and securities that carry the right to buy common stocks, including depositary receipts evidencing ownership of common stocks. The Fund may also purchase other types of securities, for example, preferred stocks, and debt securities which are convertible into common stock. The Fund may invest up to 10% of its total assets in U.S. dollar-denominated securities of non-U.S. issuers traded in the United States that are not in the S&P 500.

In selecting investments, the Fund invests primarily in companies that, in Dodge & Cox's opinion, appear to be temporarily undervalued by the stock market but have a favourable outlook for long-term growth. The Fund focuses on the underlying financial condition and prospects of individual companies, including future earnings, cash flow, and dividends. Various other factors, including financial strength, economic condition, competitive advantage, quality of the business franchise, and the reputation, experience, and competence of a company's management are weighed against valuation in selecting individual securities. The Fund typically invests in medium-to-large well established companies based on

standards of the applicable market. The fund may use derivatives to manage risk and help meet the fund's objective. A derivative is a financial instrument whose value is based on the performance of another financial asset, index, or investment. The fund may invest in other types of eligible investments which are disclosed in the fund's prospectus.

The fund is actively managed and uses the S&P 500 Index benchmark for performance comparison purposes only. The fund's portfolio of investments is built through a process of individual security selection, and the investment manager is not constrained by the benchmark in the selection of investments for the fund. The fund's investment strategy does not restrict the extent to which the fund's portfolio may deviate from the benchmark.

The base currency of the fund is U.S. dollars; your shares are denominated in pound sterling.

You may sell your shares on each day when banks in Ireland are open for normal business and the New York Stock Exchange is open for trading.

Dividend income will be reinvested in the fund and will not be distributed to you.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within a short period of time.

Risk and Reward Profile

This risk and reward indicator is designed to provide you with a measure of the price movement of this share class based on historical data over the past five years.

The indicator may not be a reliable indication of the future risk profile of the fund. The risk category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean a risk-free investment.

This share class of the fund is in category 6 because the fund invests mainly in equity and equity-related securities of companies. Such securities have historically been subject to significant price movements that may occur suddenly due to market or company-specific factors. As a result, the performance of the fund can fluctuate significantly over relatively short time periods.

The fund may also be exposed to other material risks that the risk indicator does not adequately capture. These may include:

- **Currency risk:** the risk of loss arising from exchange-rate fluctuations;
- **Liquidity risk:** the risk that the fund may not be able to purchase or sell a security in a timely manner or at desired prices or achieve its desired weighting in a security; and
- **Derivatives risk:** investment in derivatives may create leverage and may cause the fund to lose as much as or more than the amount invested.

More information on the risks of investing in this fund can be found in the fund's prospectus in the sections titled "Investment Risks and Special Considerations" and "Characteristics and Risks of Securities and Investment Techniques".

BlackRock ICS Sterling Liquidity Fund

A sub-fund of Institutional Cash Series plc

Class Premier Accumulating GBP

ISIN: IE00B43FT809

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Fund aims to maximise income on your investment consistent with maintaining capital and ensuring its underlying assets can easily be bought or sold (in normal market conditions). Money invested in the Fund is not protected or guaranteed.
- ▶ The Fund invests in a broad range of fixed income securities (such as bonds) and MMIs (i.e. debt securities with short term maturities). It may also invest in deposits with credit institutions (e.g. banks).
- ▶ The investment manager will take into account certain environmental social and governance criteria when selecting investments, as detailed in the Fund's prospectus.
- ▶ The Fund is a "Short Term Low Volatility Variable Net Asset Value Money Market Fund" (or LVNAV) as defined by the EU Money Market Funds Regulations. Details of the current credit ratings (if any) attributed to the Fund are available from www.blackrock.com/cash.
- ▶ The Fund will limit its investment to assets which have 397 days or less remaining until the full principal must be repaid. The weighted average maturity (i.e. the average length of time to the date when the principal of the asset is to be repaid in full (or, in respect of interest rate notes, the average length of time to the next interest rate reset to a money market rate) of all of the Fund's assets will be up to 60 days. The weighted average life (i.e. the average length of time to the date when the principal of the assets is to be repaid in full) of all of the Fund's assets will be up to 120 days.
- ▶ The Fund may also enter into reverse repurchase agreements on a short term basis. Through these, the Fund agrees to purchase government securities from certain eligible third parties for cash and that the seller can buy these back at an agreed time and price.
- ▶ The Fund's assets may be issued or guaranteed by both United Kingdom (UK) and non-UK issuers including governments, government agencies, companies and supranationals and shall always be denominated in Sterling. They will be rated high quality (i.e. meet a specified level of credit worthiness) at the time of purchase.
- ▶ The Fund is actively managed. The investment manager has discretion to select the Fund's investments and is not constrained by any benchmark in this process. The Sterling Overnight Index Average Rate (SONIA) should be used by investors to compare the performance of the Fund.
- ▶ LVNAV Funds are valued using a mixture of the amortised cost and mark-to-market method (i.e. a valuation based on current market prices) where possible, and, if not available, the mark to model method (i.e. a valuation based on a financial model). The NAV may be rounded for dealing purposes. A comparative NAV is also calculated using the mark-to-market method where possible, and if not, the mark-to-model method, to four decimal places daily.
- ▶ Recommendation: This Fund may not be suitable for investors who seek long-term capital growth.
- ▶ Your shares will be accumulating shares (i.e. dividend income will be included in their value).
- ▶ Your shares will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your shares daily. The Fund is valued at multiple valuation points throughout each day in order to offer investors the ability to buy and sell shares at multiple times during the day. The minimum initial investment for this share class is £500,000,000.

For more information on the Fund, share/unit classes, valuation methodology, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com.

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated one due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Short Term Money Market Funds do not generally experience extreme price variations. Changes in interest rates will impact the Fund.
- On any day where the net return (i.e. return less costs and expenses) of the Fund is negative an Accumulating Share Class of the fund will see a decrease in the NAV per Share.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Investors should therefore make a personal ethical assessment of the Fund's ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

The ongoing charge figure shown here is estimated and based on the expected annualised charges. This figure may vary from year to year. It excludes portfolio trade-related costs and any entry/exit charge paid to an underlying collective investment scheme (if any).

Practical Information

- ▶ The depositary of the Fund is J.P. Morgan SE – Dublin Branch.
- ▶ Further information about the Fund can be obtained from the latest annual and half-yearly reports of the Institutional Cash Series plc (ICS). These documents are available free of charge in English and certain other languages. These can be found, along with other information, such as share prices, on the BlackRock website at www.blackrock.com/cash or by calling the International Investor Servicing team on + 353 1612 3393.
- ▶ Investors should note that the tax legislation that applies to the Fund may have an impact on the personal tax position of your investment in the Fund.
- ▶ The Fund is a sub-fund of ICS, an umbrella structure comprising different sub-funds. This document is specific to the Fund and share class stated at the beginning of this document. However, the prospectus, annual and half-yearly reports are prepared for the umbrella.
- ▶ ICS may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Fund's Prospectus.
- ▶ Under Irish law, ICS has segregated liability between its sub-funds (i.e. the Fund's assets will not be used to discharge the liabilities of other sub-funds within ICS). In addition, the Fund's assets are held separately from the assets of other sub-funds.
- ▶ Investors may switch their shares in the Fund for shares in another sub-fund within ICS, subject to the restrictions and conditions set out in the Fund's prospectus.

BlackRock UK Equity Fund

Class I Income GBP

ISIN: GB0005803316

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund aims to provide a return on your investment (generated through an increase to the value of the assets held by the Fund and/or income received from those assets).
- ▶ The Fund will invest at least 80% of its total assets in the equity securities (e.g. shares) of United Kingdom companies. The Fund may invest in all economic sectors within the United Kingdom.
- ▶ The Fund is actively managed and the investment adviser (IA) has discretion to select the Fund's investments. In doing so, the IA will refer to the FTSE All-Share TR Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The IA is not bound by the components or weighting of the Index when selecting investments. The IA may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by unitholders to compare the performance of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be income units (i.e. dividend income will be paid semi-annually on the units).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £5,000,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Shares in smaller companies typically trade in less volume and experience greater price variations than larger companies.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2022. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

Baillie Gifford Japanese Income Growth Fund - Class B Shares

Income Shares - ISIN GB00BYZJQG71 (also representative of Accumulation Shares - ISIN GB00BYZJQH88)

This Fund is a sub-fund of Baillie Gifford Investment Funds II ICVC which is an Investment Company with Variable Capital. Baillie Gifford & Co Limited is the Authorised Corporate Director of the Fund and is wholly owned by Baillie Gifford & Co.

Objectives and investment policy

Objective

- The Fund aims to outperform (after deduction of costs) the TOPIX, as stated in sterling, by at least 1% per annum over rolling five-year periods through a combination of income and capital growth whilst maintaining a yield higher than the TOPIX.

Policy

- The Fund will invest at least 90% in shares of Japanese companies of any size and in any sector.
- Japanese companies are companies which are listed, incorporated, domiciled or conduct a significant portion of their business in Japan.
- The Fund will be actively managed.

Other Information

- You can sell some or all of your shares on any business day in the United Kingdom by contacting our Dealing Department by phone or post. Where properly completed documentation is received by post, shares will be sold at the next valuation point following receipt of the instruction.
- For Income shares any income due to you will be paid into your bank or building society account, paid on the dates specified in the Prospectus.
- For Accumulation shares income will be re-invested. No further shares will be purchased but the reinvestment will be reflected in the price of your existing accumulation shares. You are, however, deemed to have received the income for tax purposes.
- For further explanation and information see the investment objective and policy section of the Prospectus, which is available by contacting us.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

- Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in company shares.
- The indicator does not take into account the following relevant material risks.
- Over shorter time periods the Fund's share price can be volatile and returns can be much higher or lower than our five-year average target. There is no guarantee this objective will be achieved over any time period.
- In adverse market conditions it may be difficult to sell investments held by the fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.
- Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.
- You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.
- The manager can charge some, or all, of the management charge to the Fund's capital, reducing its value. This amount can vary from year to year.
- For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Janus Henderson

European Selected Opportunities Fund Class I Acc ISIN: GB0032473653

A sub-fund of Janus Henderson Investment Fund Series I, a UK OEIC managed by Janus Henderson Fund Management UK Limited.
Fund Currency: GBP Share Class Currency: GBP

Objective and investment policy

Objective

The Fund aims to provide a return, from a combination of capital growth and income over the long term (5 years or more).

Investment policy

The Fund invests at least 80% of its assets in shares (also known as equities) of companies, of any size, in any industry, in Europe (excluding UK). Companies will be incorporated, headquartered, listed on an exchange in, or deriving significant revenue from, this region.

The Fund may also invest in other assets including cash and money market instruments.

The investment manager may use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the FTSE World Europe Ex UK Index, which is broadly representative of the companies in which it may invest, as this can provide a useful comparator for assessing the Fund's performance. The investment manager has discretion to choose investments for the Fund with weightings different to the index or not in the index.

As an additional means of assessing the performance of the Fund, the IA Europe ex UK sector average, which is based on a peer group of broadly similar funds, may also provide a useful comparator.

Strategy

The investment manager looks to anticipate catalysts for change in companies and industries based on fundamental research and thought leadership, in order to construct a portfolio of large companies complemented by mid-size company opportunities with the potential to enhance the Fund's overall returns. Smaller companies are not normally a significant focus of the portfolio.

Distribution policy The Fund offers accumulation shares (shares in which net income is retained within the price) and income shares (shares in which net income may be paid out to investors).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any dealing day and according to certain restrictions, both defined in detail in the Company's Prospectus.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.janushenderson.com.

Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The rating above is based on the historic volatility of the share class. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The share class appears at 6 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

Other material risks not captured by the rating:

Equities Shares/Units can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Smaller Companies Shares of small and mid-size companies can be more volatile than shares of larger companies, and at times it may be difficult to value or to sell shares at desired times and prices, increasing the risk of losses.

Country or Region If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.

Concentration This Fund may have a particularly concentrated portfolio relative to its investment universe or other funds in its sector. An adverse event impacting even a small number of holdings could create significant volatility or losses for the Fund.

Derivatives The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. mitigated by taking an offsetting position in a related security), the value of your investment may be impacted by changes in exchange rates.

Liquidity Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparty Risk and Operational Risk The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	0.00%
Exit Charge	0.00%**

* The charges shown are maximum figures. In some cases you may pay less.

** Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another Fund.

For more information about Charges please see the Company's Prospectus.

The past performance is calculated in GBP.

The Fund was launched in August 1984 and the share class was launched in January 2003.

Past performance does not predict future returns.

The past performance takes into account all charges except one-off charges.

The Fund does not aim to track the performance of the benchmark.

*Class I Acc was launched in January 2003. Performance prior to that date is simulated past performance based on the Class A Acc of the same Fund which reflects a different ongoing charge, which was 1.73% for the period ended 31 May 2022.

Pacific North Of South EM All Cap Equity

Class GBP I Accumulating Shares | ISIN: IE00BD9GKZ43

A sub-fund of Pacific Capital UCITS Funds plc

The Investment Manager of the Fund is Pacific Capital Partners Limited (the "Investment Manager")

The Manager is KBA Consulting Management Limited ("the Manager")

Sub-Investment Manager is North of South Capital LLP (the "Sub-Investment Manager")

Objectives and Investment Policy

Investment Objective: The investment objective of the Fund is to achieve long-term capital appreciation.

Investment Policy: The Fund is considered to be actively managed, which means that the Investment Manager is not constrained by any index or benchmark in the selection of investments. The performance of this Fund is measured against the MSCI Emerging Markets Gross Total Return Index (in the currency of the Class) for the purposes of the calculation of performance fees for the Class. The Fund does not intend to track this index. This index was chosen because it represents the minimum level of return that is expected from the Fund over the stated time period. The majority of the Fund will not be components of the index.

The Fund seeks to achieve this objective through investing primarily in equity and equity related securities (such as warrants and rights issues) of companies listed on or dealt in Recognised Markets in emerging markets or which are listed on or dealt in Recognised Markets outside of the emerging markets but which generate the bulk of their earnings in emerging markets.

The Fund will only take long positions for investment purposes. The maximum anticipated long exposure of the Fund is 115% of its Net Asset Value (100% direct investment and 15% leveraged exposure). The Fund may take short exposures for hedging purposes only and the maximum anticipated exposure in this regard is 20% of its Net Asset Value. The Base Currency of the Fund is US Dollar. Non Base Currency Share Classes are unhedged. See under "Risk and Reward Profile" for further detail. No more than 20% of the Net Asset Value of the Fund may be invested in the Russian market.

The investment team combines top-down analysis and bottom up company research in order to build a portfolio of liquid and diversified holdings. The Fund's investments will have no industrial or sectoral focus.

The Fund may use derivatives for investment purposes and / or efficient portfolio management purposes. Further information in respect of the Fund's use of derivatives is set out in the Derivatives section of the Fund's Supplement.

The Fund may enter in to Repurchase Agreements and Reverse Repurchase Agreements, and Stocklending Agreements for the purpose of efficient portfolio management.

An investment in the Fund is designed to be a long-term investment of typically 7 years and investors should not expect to obtain short-term gains from such investment.

Investors are able to buy and sell shares in the Fund on any day (except Saturday or Sunday) on which banks are open in Ireland, the UK and the USA.

Risk and Reward Profile

Lower risk

Typically lower rewards

Higher risk

Typically higher rewards

Why is the Fund in this category? The lowest category does not mean 'risk free'. The Fund's risk category shown is based on historical data and is not guaranteed. Furthermore, it may not be a reliable indication of the future risk profile of the Fund.

The Fund is categorised as a 6 because it is invested in financial markets and uses techniques and instruments which are subject to some level of variation which may result in gains and losses.

Additional risks that may have a significant effect on Fund performance includes:

- **Currency Risk** – The base currency of the Fund is US Dollar. Non-base currency share classes of the Fund will be unhedged and subject to the impact of the movement of exchange rate between the currency of the share class and the base currency of the Fund which may cause a decline in value.
- **Emerging Market Risk** – Emerging markets by their nature are more volatile and prone to sporadic and unpredictable asset returns. This is caused by varying macro-economic factors such as interest rate risk, liquidity risk, and political risks.
- **Equity Risk** – Investments in equity and equity related securities can contain higher levels of risk and therefore be subject to higher potential changes in value.
- **Counterparty Risk** – A counterparty to a non-exchange financial derivative contract may not be able to meet its payment obligations in the event of default.
- **Liquidity Risk** – The Depositary may appoint sub-custodians in certain jurisdictions to hold assets of the Fund. Custody services in certain emerging markets jurisdictions remain undeveloped, and accordingly there are transaction and custody risks of dealing in certain emerging markets jurisdictions.
- **Country Risk** – Russia: Issues with settling transactions, corporate governance, rules / regulations protecting investors, publicly available information, tax regulations, banking system, and government support for economic reform are examples of the risks inherent in this market.

The value of the Fund's investments and the shares in the Fund may rise as well as fall and an investor may not get back the amount s/he invests. Any investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The risk category of the Fund is not fixed and may well change over time. A full list of risks applicable to this Fund can be found in the Prospectus and Supplement. See under "Practical Information" for how to obtain a copy.

Allianz UK & European Investment Funds - Allianz Gilt Yield Fund Share Class I (Inc) (GBP)

Managed by Allianz Global Investors UK Limited,
part of Allianz Global Investors

ISIN: GB0031383390

Objectives and Investment Policy

The objective of the Fund is to maximise total return primarily through investment in UK Government Securities. Investors should be aware that the Fund's capital is at risk and there is no guarantee that the Fund will achieve its investment objective over any particular period or at all.

We may invest in gilts, overseas government bonds, government guaranteed bonds, supranational bonds, deposits, money market instruments, derivatives, collective investment schemes. At least 80% of the Fund's value will be invested in gilts. Up to 20% of the Fund's value may be invested in Sterling denominated (or hedged back to Sterling) debt securities, which are not issued by, but with a rating the same or higher than that of, the UK Government.

The Fund may use derivative instruments such as futures, options, options on swaps and swap agreements (e.g. interest rate swaps). The Fund may use the derivative instruments listed above for hedging purposes and/or for investment purposes.

Benchmark of the fund is FTSE Actuaries UK Conventional Gilts All Stocks Mid Price Return (in GBP).

Due to its investment strategy we expect a high volume of transactions which results in higher transactions costs reducing the return of the fund.

Although the Fund will invest primarily in gilts which constitute the benchmark, the Fund is actively managed and may deviate from the benchmark and invest in securities that are not included in the benchmark. It will be constrained to a limited extent only by the benchmark.

You may redeem shares of the fund usually on each business day by 12:00.

We usually distribute the income of the fund on a semiannual basis.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and Reward Profile

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the fund.

The categorisation of the fund is not guaranteed and may change in the future.

Even the lowest category 1 does not mean a risk-free investment.

Why is the fund in this category?

Funds of category 5 have shown in the past a medium to high volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 5 might be subject to medium to high price fluctuations based on the historical volatilities observed.

We may invest directly or indirectly a significant portion of the fund into bonds or money markets instruments. If the issuer may fall into insolvency or may suffer economical problems the interest and/or the capital of these assets may not or may not be completely paid and/or the price of the assets may drop.

Charges

These charges are used to pay the costs of running the fund, including the costs of marketing and selling. They reduce the potential growth of your investment.

One-off charges deducted before or after you invest

Entry Charge	0.00%
Exit Charge	0.00%

This is the maximum charge that might be taken out of your money before it is invested or before the proceeds of your investments are paid out.

Charges taken from the fund over a year

Ongoing Charges	0.32%
-----------------	-------

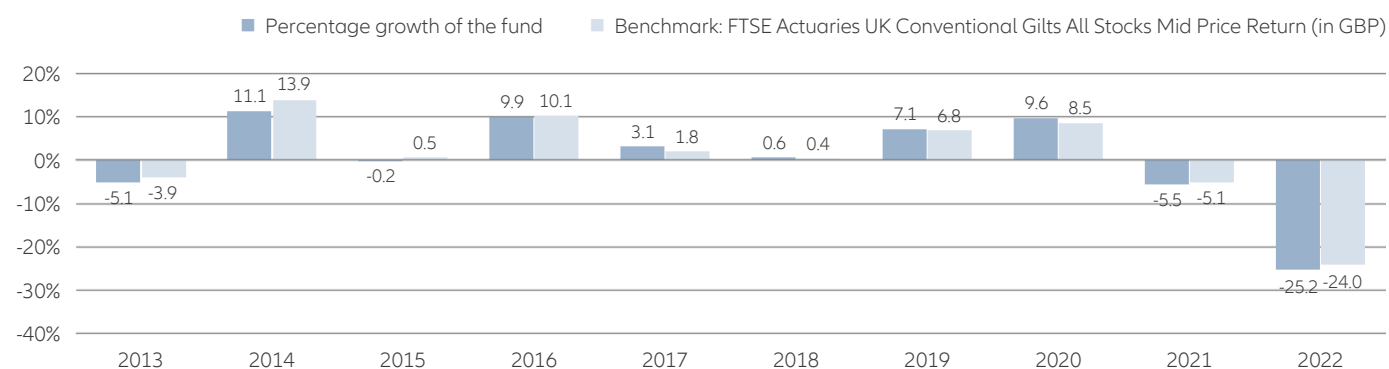

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find actual entry and exit charges from your financial adviser.

The ongoing charges shown are based on the fund's last financial year ending 31.08.2022. It may vary from year to year. It does not include transaction costs incurred when we buy or sell assets for the fund.

A dilution levy may be charged on purchases and redemptions of shares to protect the remaining investors against the costs incurred by the fund in buying or redeeming its investments. This levy may be charged where the fund is experiencing large levels of net purchases/redemptions and on "large deals" (i.e. deals of 2% or more of the value of the fund). The amount of any such dilution levy is calculated by reference to the estimated costs of dealing in the underlying investments using the rates calculated for the preceding quarter.

You will find more details about the calculation of the charges in the prospectus.

Past Performance

Past performance is not a reliable guide to future performance.

The past performance shown here takes account of all charges and costs with the exception of the entry and exit charge.

The fund was launched in 2002.

The performance of the fund is calculated in GBP.

Wellington Global Credit ESG Fund

GBP G AccH

Wellington Global Credit ESG Fund (the "Fund") a Fund of Wellington Management Funds (Ireland) plc (the "Company")

ISIN: IE00025U2DQ2

Management company: Wellington Luxembourg S.à r.l.

OBJECTIVES AND INVESTMENT POLICY

- The Fund seeks long-term total returns (capital appreciation and income) in excess of a custom Bloomberg Global Aggregate Corporate Index composed of investment grade corporate bonds with minimum amounts outstanding denominated in US Dollars, Euros, and Sterling with individual issuers capped at 1%, financials capped at 40% and excluding certain subordinated debt instruments.
- The Fund will be actively managed, investing primarily in a diversified portfolio of investment grade corporate bonds of global issuers. It may also invest in securities issued by government or supranational issuers, mortgage and other asset-backed securities, as well as exchange-traded and over-the-counter derivatives. The Fund will generally be diversified by country, currency, sector and issuer, but may hold positions that are concentrated from time to time.
- The Fund's construction is based on top-down analysis of global investment themes, rigorous fundamental economic analysis and specialist research on individual credit sectors with bottom-up security selection. The Investment Manager also applies an ESG framework to investment decisions. The Investment Manager uses proprietary ESG Ratings that are based on a comparative pool of global issuers and inputs from the Investment Manager's research analysts as well as third party sources. These are used to assess how ESG activities and attributes of issuers are likely to impact their ability to repay debt, both now and in the future. Issuers that have the worst ESG ratings are removed from the investment universe; issuers with below average ESG Ratings may only be included in the Fund if the Investment Manager determines that the Fund is adequately compensated for the additional risk.
- In addition, the Investment Manager applies several binding restrictions. These restrictions support certain ESG characteristics by excluding issuers identified as being responsible for significant environmental or social harm around the world. A full list of these binding restrictions can be found in the Fund's prospectus.
- The Fund will apply this ESG framework to its investment analysis and decisions on at least 90% of the holdings (excluding cash and cash equivalents) with the aim of achieving full coverage over time as the disclosure of ESG information improves. The Fund aims to be fully invested with cash and cash equivalents held on an ancillary basis.
- The Investment Manager will also seek to reduce the Fund's carbon footprint as measured by its weighted average carbon intensity (WACI) to net zero by 2050, or sooner, in line with the Paris Agreement. The investment manager will manage the Fund towards this 2050 net zero commitment by reducing the Fund's WACI figure by no less than 50% below the Index's 2019 baseline WACI by 2030 and aim to achieve net zero by 2050. The Investment Manager will seek to engage with companies that contribute at least 50% of the Fund's WACI, with the intent to encourage companies to disclose climate risks, publish carbon emissions data, set science-based targets or other credible carbon emission reduction targets and follow through with these commitments. The Investment Manager will engage with these WACI contributors at minimum once every two years to determine whether these companies are tracking towards meeting their net zero commitments.
- The Index may be considered during portfolio construction and is used for performance comparison and baseline WACI purposes. Fund securities may be components of the Index but are not expected to have similar weightings.
- Derivatives will be used to hedge (manage) risk and/or volatility and for investment purposes (such as gaining exposure to a security, to create leverage and/or a short position). Derivatives will form a significant part of the strategy and will impact performance.
- Any income allocated to the Share class from the Fund is reinvested.
- Shares can be bought or sold daily in accordance with the Prospectus. The base currency of the Fund is USD.
- This Fund may not be appropriate for investors who plan to withdraw their money within five years.
- This Share class will, via derivatives, seek to provide similar benchmark relative performance to that of the Fund by managing the impact of the movement of exchange rates between the currency of the Share class and the underlying currencies within the reference benchmark.

For full investment objectives and policy details, please refer to the Prospectus.

RISK & REWARD PROFILE

< LOWER RISK

< Typically Lower Rewards

HIGHER RISK >

Typically Higher Rewards >

The indicator is not a measure of the risk of capital loss, but a measure of the previous ups and downs in value of the Fund. It is based on historical data and may not be a reliable indicator of the Fund's future risk profile. If the Fund has been in operation for less than 5 years, representative history, such as a comparable Share class or index, may have been used to create the indicator.

- The indicator may shift over time and is not a target or guarantee.
- The lowest category does not represent a risk-free investment.
- The Fund is classified as a 4 as over the past 5 years the average amount by which returns varied each year was equal to or above 5% and less than 10%.

MATERIAL RISKS RELEVANT TO THE FUND WHICH ARE NOT FULLY CAPTURED BY THE INDICATOR:

BELOW INVESTMENT GRADE: Lower rated or unrated securities may have a significantly greater risk of default than investment grade securities, can be more volatile, less liquid, and involve higher transaction costs.

COUNTERPARTY: The institutions with which the Fund may trade or invest, or to which assets may be entrusted, may fail to meet their obligations which could impact the operational capability or value of your investment.

CREDIT: The value of a bond may decline, or the issuer/guarantor may fail to meet payment obligations. Typically lower-rated bonds carry a greater degree of credit risk than higher-rated bonds.

CURRENCY: The value of the Fund may be affected by changes in currency exchange rates. Unhedged currency risk may subject the Fund to significant volatility.

DERIVATIVES: Specific risks such as operational issues, complexity, and valuation may be linked to the possible use of derivatives.

HEDGING: Any hedging strategy using derivatives may not achieve a perfect hedge.

INTEREST RATES: The value of bonds tends to decline as interest rates rise. The change in value is greater for longer term than shorter term bonds.

LIQUIDITY: The Fund may invest in securities that are less liquid and may be more difficult to buy or sell in a timely fashion and/or at fair value.

OPERATIONAL: The impact of breakdowns in systems, internal procedures and human error.

SUSTAINABILITY: A Sustainability Risk can be defined as an environmental, social or governance event or condition that, if it occurs, could cause an actual or potential material negative impact on the value of an investment. Further information on specific Sustainability Risks can be found in the Fund's prospectus.

A more detailed description of the risk factors that apply to the Fund is set out in the section "Risk Factors" in the Prospectus.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including marketing and distributing costs. These charges reduce the potential growth of your investment.

ONE-OFF CHARGES TAKEN BEFORE OR AFTER YOU INVEST	
Entry Charge	0.00%
Exit Charge	0.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out. Separately, your financial advisor or intermediary may charge you a transaction fee.

CHARGES TAKEN FROM THE FUND OVER A YEAR	
Ongoing Charges	0.37%

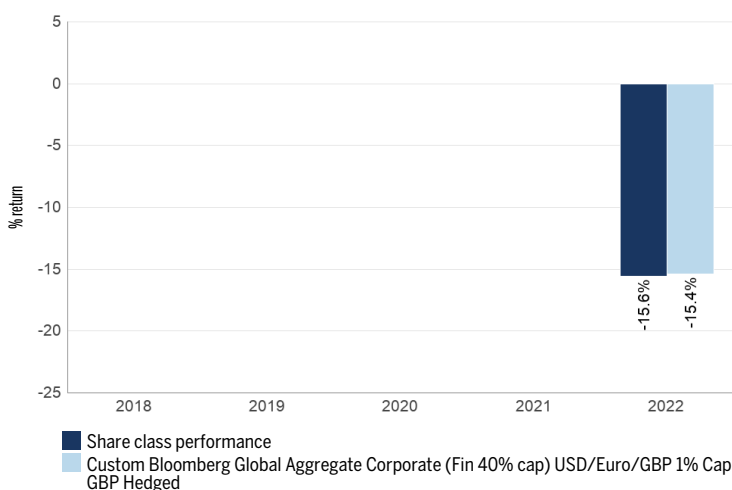

CHARGES TAKEN FROM THE FUND UNDER CERTAIN SPECIFIC CONDITIONS	
Performance Fee	N/A

The ongoing charges figure is based on expenses for the 12 month period ending December 2022. This figure may vary from year to year.

The ongoing charges figure excludes Fund transaction costs, except in the case of depositary fees and an entry/exit charge paid by the Fund when buying or selling Shares in another collective investment undertaking.

A more detailed description of the charges that apply to the Fund is set out in the section "Charges and Expenses" in the Prospectus.

PAST PERFORMANCE

- Past performance does not guarantee future results.
- Any Share class performance is expressed as a percentage change of the Share class's net asset value at each year-end, adjusted to reflect the reinvestment of any declared distributions in the year. Performance is shown after deduction of ongoing charges. Any entry/exit fees or taxes that may arise from an investment in this Share class are excluded from the calculation.
- The year of inception of the Share class is 2021.
- The graph shows annual performance in GBP.
- The Share class does not intend to track the Index.

Veritas Asian Fund (the Fund) – Class A Acc GBP

The Fund is a sub-fund of Veritas Funds PLC
Management Company: KBA Consulting Management Limited

ISIN: IE00BGV1VN30

Objectives and Investment Policy

The Fund is designed for long-term investors who wish to build capital over a number of years through investment in a focused portfolio of equities and equity related securities in companies located in Asia (excluding Japan). The Fund is actively managed and is not managed in reference to, or constrained by, any benchmark.

The Fund may gain exposure to the equities issued by companies whose business or the business of their parent company is located or conducted primarily in the People's Republic of China. Such exposure is gained by entering into arrangements with and acquiring notes or similar equity linked securities or instruments issued by institutions that have obtained Qualified Foreign Institutional Investor status through which the Fund can gain exposure indirectly to the China A Share market. Examples of the notes or similar equity linked securities or instruments are listed P-Notes and warrants. These will be fully financed positions and so have no leverage or finance elements. Exposure may also be gained through OTC derivatives such as swaps. The Fund may also gain exposure to certain equities listed on mainland China stock exchanges via Hong Kong through the market access programme through which foreign investors can deal in select China A Shares ("Stock Connect"). The transaction may be executed by entering into an agreement to acquire a participatory note or warrant issued by a counterparty or directly via the Special Segregated Account Model.

The Fund may invest in listed Indian P-Notes. Such exposure is gained by entering into arrangements with and acquiring notes or similar equity linked securities or instruments issued by institutions that have obtained Foreign Institutional Investor status through which the Fund can gain exposure indirectly to the Indian securities market. These will be fully financed positions and so have no leverage or finance elements. The Fund may also pursuant to a Foreign Portfolio Investor license under the Indian FPI regulations, invest directly in Indian securities issued by Indian issuers.

Investments in the Fund may include financial derivative instruments. Such instruments may be used to obtain, increase or reduce exposure to underlying assets and may create leverage; therefore their use may result in greater fluctuations of the Net Asset Value of the Fund. The Investment Manager will ensure that the use of derivatives does not materially alter the risk profile of the Fund.

You can buy, sell and switch shares of the Fund on demand on any Business Day as defined in the "Definitions" section of the Fund's Prospectus.

The base currency of the Fund is USD.

This share class does not intend to pay dividends. Any income which may result from the Fund's investments, will be reinvested into the Fund.

Risk and Reward Profile

The Risk and Reward Indicator table shows where this share class ranks in terms of its potential risk and return. The higher the rank, the greater the potential reward but the greater the risk of losing money. It is based upon studies of how such investments have performed in the past and you should note that this share class may well perform differently in the future. The shaded area in the table above shows the share class's ranking on the Risk and Reward Indicator. The lowest category does not mean that a share class is risk free. The table uses a standard calculation method that is used by all EU companies who offer such funds to allow you to compare funds.

Historical data may not be a reliable indication for the future. The rating is not guaranteed to remain the same and the risk/reward category may change over time.

This share class is in a higher risk category because it invests primarily in shares. Shares may offer high long-term growth potential, but the prices of shares fluctuate and often go down as well as up. The Fund invests in Emerging Market equities which have historically experienced more price volatility than developed markets. In addition, the Fund has a currency risk given that it invests in shares which are priced in different currencies.

The Fund may also be exposed to counterparty risk which could lead to financial loss if a counterparty is unable to meet its contractual obligations. The Fund is also exposed to liquidity risk where there could be insufficient buyers or sellers to trade the underlying holdings.

Recommendation: The Fund is suitable for investors with a long-term time horizon – typically five years.

A more detailed description of risk factors that apply to this Fund is set out in the "Risk Warnings" section of the Supplement.

Charges for this fund

One off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charges	1.07%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	None
-----------------	------

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The ongoing charges are based on expenses for the year ending 31.12.2021. This figure may vary from year to year and is based on total expenses for the Fund which are higher than the standard management charge. It excludes portfolio transaction costs and any performance fees.

For more information about charges, please see the "Charges and Expenses" section of the Prospectus and the "Fees" section of the Supplement of the Fund, which is available at www.vamllp.com.
